

Cwm Engineering Ltd - Environmental and Energy Policy

At Cwm Engineering Ltd, we are committed to minimizing our environmental impact and promoting sustainable practices throughout our operations. We recognize that environmental responsibility is essential for the well-being of our planet and future generations. Therefore, we have developed the following Environmental and Energy Policy to guide our actions:

Compliance

We will comply with all applicable environmental laws, regulations, and standards, as well as other requirements to which we subscribe voluntarily.

Resource Conservation

We strive to minimize our use of natural resources, including energy, water, and raw materials. Through efficient processes, responsible consumption, and waste reduction initiatives, we aim to conserve resources and minimize environmental footprints.

Pollution Prevention

We are committed to preventing pollution and reducing the release of harmful substances into the environment. We will continuously improve our practices to minimize air, water, and soil pollution, as well as the generation of hazardous waste.

Emissions Reduction

We are dedicated to reducing our greenhouse gas emissions and other air pollutants. We will identify opportunities for energy efficiency, promote the use of clean energy sources where feasible, and invest in technologies that minimize emissions.

Waste Management

We will implement waste management practices that prioritize waste reduction, reuse, and recycling. Our aim is to minimize waste sent to landfills and promote the responsible disposal of hazardous materials in accordance with relevant regulations.

Supplier and Contractor Engagement

We will work closely with our suppliers and contractors to encourage sustainable practices, including responsible sourcing, waste management, and energy efficiency.

Continuous Improvement

We are committed to setting and regularly reviewing environmental objectives and targets to drive continuous improvement in our environmental performance. We will monitor our progress, measure key indicators, and seek opportunities to enhance our environmental practices.

Employee Engagement and Training

We will raise awareness among our employees about their roles and responsibilities in achieving our environmental and energy goals. We will provide appropriate training to promote environmental consciousness and encourage their active participation in our environmental and energy initiatives.

Stakeholder Communication

We will maintain open and transparent communication with our stakeholders, including customers, employees, suppliers, and the local community, to foster a shared commitment to environmental sustainability and energy efficiency.

Energy Efficiency and Conservation

In addition to our environmental commitments, we recognize the critical importance of managing and conserving energy within our operations:

- **Energy Efficiency:** We are dedicated to improving energy efficiency across all aspects of our business. This includes optimizing our manufacturing processes, ensuring our facilities and equipment are energy-efficient, and investing in technologies that reduce energy consumption.
- **Renewable Energy:** Where feasible, we will explore and adopt the use of renewable energy sources to decrease our reliance on fossil fuels, aiming to reduce our carbon footprint and contribute to a more sustainable future.
- **Energy Management:** We will implement systematic energy management practices, including monitoring and analysing our energy usage, to identify areas for improvement and set actionable energy-saving targets.

Review and Compliance

We will regularly review and update our Environmental and Energy Policy to ensure its continued suitability and effectiveness. We will conduct periodic internal audits to assess compliance with our policy and identify areas for improvement.

By adhering to this Environmental and Energy Policy, we aim to be responsible stewards of the environment and contribute to a sustainable future. This policy will be communicated to all employees, made available to the public, and periodically reviewed for its effectiveness.
